Sharepoint file input tool – Alteryx – Developer system steps (Paulomi & Siva)

Please add the registry key to your laptop and the Server, save the workflow and upload it to the Gallery.

- Registry Key: HKEY_LOCAL_MACHINE\SOFTWARE\WOW6432Node\SRC\Alteryx
  Value Name: PythonAllowHideEncryption
  Value Data: true
- Note: This key must be set on each user's machine as well as on all Worker nodes.
- Steps to create the new key:
    - Type **regedit** in Windows Start Menu
    - Run as admin
    - Browse to the folder location: HKEY_LOCAL_MACHINE\SOFTWARE\WOW6432Node\SRC\Alteryx
        - If you do not have SRC in your list, right click on WOW6432Node and create new Key called SRC. Under SRC, create a new key called Alteryx.
    - Right-click on Alteryx and select **New** > **String Value**
    - Set the KeyName to **PythonAllowHideEncryption** and the Value to **true**
